EDUCATION

B.Tech in Electrical Engineering, IIT Jodhpur	Jun 2026	CGPA: 7.69
Class XII, Jawahar Navodaya Vidyalaya, Porbandar	Jul 2021	73.60%
Class X, Jawahar Navodaya Vidyalaya, Porbandar	May 2019	90.80%

EXPERIENCE

Backend Software Engineer Intern, Advertyzement Jun 2025 – Jul 2025

- Developed a scalable **FastAPI**-based service for secure storage, retrieval, and streaming of multimedia files, integrating **AWS S3** and **PostgreSQL**.
- Implemented **asynchronous pipelines** using Celery + RabbitMQ, improving system performance through efficient upload/processing workflows.
- Engineered automated **CI/CD** workflows in GitLab and containerized the entire stack with **Docker**.

PROJECTS

Karma Trading (Agro-Merchant Billing & Analytics Platform) GitHub | Live Site

- Created a product for a local crop-trading firm, **Karma Trading** — featuring invoice generation with a digital billbook, a **Trade** feature that records the cash flow of a full business cycle (viewable per record in the **Tradebook**), profile configuration to autofill repeated invoice details, and a chatbot integrated for business analysis.
- Deployed an async **FastAPI** + **PostgreSQL** backend, containerized with **Docker** on a **GCP** VM behind **Cloudflare** Tunnels (zero exposed ports), with a **React** + Vite frontend on Vercel.
- Integrated a chatbot powered by an **LLM-driven assistant** (**LangGraph**) that processes business questions and identifies the next move, generating **SQL** queries and returning written analysis alongside auto-generated plots, tables, and charts.
- **Stack:** FastAPI, React, PostgreSQL, Docker, GCP, Cloudflare, LangGraph, OpenAI API.

Civil Comment Classifier (LoRA + XGBoost Hybrid Text Classifier) GitHub

- Built a hybrid text-classification pipeline to flag toxic comments, training on **100K+** streamed samples from Google's **Civil Comments** dataset (HuggingFace).
- **Fine-tuned RoBERTa-base** with **LoRA** adapters for parameter-efficient tuning, training only the adapter weights with mixed-precision **AdamW** over **3** epochs, then mean-pooled the last-hidden-layer embeddings and compressed them via **Truncated SVD** to cut dimensionality while retaining most of the variance.
- Trained the SVD-compressed embeddings on an **XGBoost** classifier with stratified **5**-fold cross-validation — the LoRA+XGBoost hybrid consistently outperformed the fine-tuned transformer's own classification head on holdout **ROC-AUC**.
- **Tech:** PyTorch, HuggingFace Transformers, LoRA, XGBoost

Credit Risk Scoring & Default Prediction Engine GitHub | Live Site

- Developed a credit risk engine to predict the **Probability of Default (PD)** using the UCI **Default of Credit Card Clients** dataset, building a **26-feature** engineering pipeline to capture complex borrower behavior.
- Trained an **XGBoost** classifier by conducting rigorous hyperparameter tuning to identify the optimal model parameters, achieving **0.78 ROC-AUC** and **0.56 Gini** while setting an F1-optimal decision threshold.
- Wrote modular Python functions to automate end-to-end model training and artifact generation, which are seamlessly consumed by a live **Streamlit** dashboard for real-time applicant scoring and risk-tiering.
- **Tech:** Python, XGBoost, Scikit-learn, Pandas, Streamlit, Kaggle Hub API.

COMMUNITY & LEADERSHIP

- Core member of SAA Society; transportation team at Dashak event.
- School Captain (Grade 11), JNV Porbandar: Led student representation, mediated with faculty, held key leadership role.

TECHNICAL SKILLS

- **Languages:** Python, SQL, R, C++
- **Data Analysis & ML:** Pandas, NumPy, Excel, Scikit-learn, XGBoost, PyTorch, TensorFlow/Keras, Transformers, LLM Fine-tuning (LoRA), LangGraph, Statistical Analysis, Feature Engineering, Econometrics
- **Tools / Platforms:** PostgreSQL, Docker, Git, AWS, GCP, Streamlit
- **Relevant Coursework:** PRML, Deep Learning (DL), Artificial Intelligence (AI), Computer Vision (CV), Probability & Statistics for Engineers (PSSP), Econometrics, Equity & Derivatives
- **Domain Knowledge:** Keen interest and knowledge in Trading and Financial Engineering concepts.
